

# ST. GABRIEL LABORATORIES

**CONCENTRATE FORMULA**

# DEER REPELLENT

PROTECTION UP TO 3 MONTHS

**SHAKE WELL**

ALSO REPELS THESE ANIMALS

SAFE FOR FRUITS AND VEGETABLES • PROTECTS BY BOTH SCENT AND TASTE

NET CONTENTS: 32 oz.

TREATS 11,000 SQUARE FEET

INGREDIENTS	
<b>Active Ingredients:</b>	
Garlic	28.4200%
Potassium Sorbate	0.1000%
Black Pepper	0.1450%
Cinnamon Oil	3.2000%
<b>Inert Ingredients:</b>	
Water	12.9900%
Milk	14.0000%
Citric Acid	5.0000%
Mineral Oil	36.0000%
Sodium Benzoate	0.1450%
<b>TOTAL</b>	<b>100.0000%</b>

## KEEP OUT OF REACH OF CHILDREN CAUTION

READ THE ENTIRE LABEL BEFORE USING THIS PRODUCT. USE ONLY ACCORDING TO THE DIRECTIONS ON THE LABEL AND OBSERVE ALL PRECAUTIONS.

### PRECAUTIONARY STATEMENTS

#### STATEMENT OF PRACTICAL TREATMENT/FIRST AID

**IF IN EYES:** For contact with eyes, flush with plenty of water. If irritation develops and persists, get medical attention.

**IF SWALLOWED:** Drink promptly large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention. Do not induce vomiting.

**IF INHALED:** If inhaled, remove victim to fresh air. If not breathing, give artificial respiration and get medical attention.

#### ENVIRONMENTAL HAZARDS

This product may be hazardous to aquatic invertebrates.

**Surface Water:** Keep out of lakes, streams or ponds. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning equipment or waste disposal.

#### STORAGE AND DISPOSAL

**STORAGE:** Store in a cool, dry area. Store out of reach of children and animals. Keep container closed. Protect liquid formulations from heat and freezing.

**CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by burning.

**IMPORTANT NOTICE** - Seller warrants that this product conforms to its description and is reasonably fit for the purposes stated on the label when used in accordance with the directions and instructions specified on the label under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product, contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

**COVERAGE:** TREATS 11,000 SQUARE FEET.

#### DEER

Nursery stock and ornamental trees and shrubs: For treating foliage, St. Gabriel Laboratories' Hose-end sprayer is calibrated at a 1:15 mixing ratio. Apply as a full coverage spray. Do not irrigate from overhead for at least 6 hours after treatment.

**Annual and perennial flowers:** Apply as a full coverage spray. Do not irrigate from overhead for at least 6 hours after treatment. Note: a preliminary trial is recommended to determine plant tolerance. Open flowers (example petunias, impatiens, begonias) may show spotting and petal fall after treatment. Foliage on some sensitive plants (e.g. impatiens, zinnia, bleeding heart, roses, and columbine) can show minor marginal burning. New foliage growth and flower buds that open after treatment usually will be unaffected (except for salvia, and possibly some other types).

**Fruits and Vegetables:** Apply at rates of 30-50 gallons of spray solution per acre.

**Apple and pear trees:** Using ground rig equipment, treat outer vegetation on all lower branches up to 6 - 8 feet above the ground surface. Apply spray until all vegetation to be protected has been made wet. When treating fruit bearing trees, use equipment that provides uniform coverage.

#### RABBITS & OTHER ANIMALS

Home gardens: Apply as a thorough coverage spray. Apply to just above the height that rabbits might reach.

## **APPLICATION DIRECTIONS** Continued from back panel:

For best results, apply Deer Repellent before the animals start feeding on the plants to be protected. Deer Repellent makes treated plant tissues less palatable to deer and rabbits and can influence them to leave the treated plants alone in favor of other foliage. Under conditions of severe hunger, treated plants may be damaged substantially. In some cases, protection of plants from deer damage may be enhanced by providing a secondary food source such as baled hay just outside the treated area at the time of treatment. In other cases, permanent fencing or temporary enclosures may be needed. Consult specific directions (below) for the target species and type of treatment involved in your control situation.

This product may be used to limit browsing by white tail deer (*odocoileus virginianus*) and black tail or mule deer (*o. hemionus*), on ornamental trees and shrubs, annual and perennial flowers, nursery stock, soybeans, peanuts and all fruits and vegetables.

This product may also be used to discourage feeding by cottontail rabbits (*sylvilagus floridanus*) and black-tail jack rabbits (*lepus californicus*) on home gardens and on the trunks of nursery stock and ornamental trees. When considering use of this product during cold weather, note that a temperature of at least 40° F for a four-hour period is needed to allow proper drying time. In winter, apply when browsing starts. Seedlings may be retreated if browsing continues beyond 2 months. In the spring, apply after bud break and before new shoots are more than 1 inch long. If browsing starts before bud break, apply to unopened buds, and re-apply after buds are 4 inches long, if browsing still persists.
